Humanitarian Activities

At the beginning of the full-scale war, hundreds of thousands of Ukrainians, fleeing from russian aggressors or not wanting to stay in the temporarily occupied territories, were forced to relocate to safer regions of Ukraine. The project participants pooled all their capabilities, resources and connections to help Ukrainians rebuild their lives in their new places of residence - to have housing, food, clothing, hygiene products, medicines and other necessities.

Entrepreneurship development projects

The war unleashed by Russia in Ukraine has taken away many people's jobs and livelihoods, so the project partners have joined forces to build economic resilience in local communities, provide grant support and development of small and medium-sized businesses, and ensure conditions for temporarily displaced citizens, families of military personnel and other active Ukrainians to start their businesses.

Results of our implemented projects: investments - **USD 1.4m**; new jobs created - **528**

Resilience Centres

During the war and after the Victory of Ukraine, veterans, their families, IDPs, people with disabilities, and other inclusive groups need exceptional support. At the same time, at the level of local Ukrainian communities, there are currently no single centres to deliver a complete package of social services and no unified system of psychological assistance and social integration services.

The project participants united to create an effective model for integrating social services by creating modern special centres (spaces) in local communities.

Projects under implementation/development: planned investment – USD570k
