Humanitarian Activities

At the beginning of the full-scale war, hundreds of thousands of Ukrainians, fleeing from russian aggressors or not wanting to stay in the temporarily occupied territories, were forced to relocate to safer regions of Ukraine. The project participants pooled all their capabilities, resources and connections to help Ukrainians rebuild their lives in their new places of residence - to have housing, food, clothing, hygiene products, medicines and other necessities.

During the war and after the Victory of Ukraine, veterans, their families, IDPs, people with disabilities, and other inclusive groups need exceptional support. At the same time, at the level of local Ukrainian communities, there are currently no single centres to deliver a complete package of social services and no unified system of psychological assistance and social integration services.

The project participants united to create the Resilience Programme - an effective model for integrating social services by creating modern special centres (spaces) in local communities.

**Projects under implementation/development:** investments – USD342k
